Content Gap Recommendations

Add this content to improve your coverage score

- Expand the 'Navigating legal betting markets' section to explicitly list all legal states in a structured list or table to aid AI entity extraction for location-based queries.
- Include concise definitions of key betting terms (e.g., 'moneyline', 'spread') directly in the 'How to Bet' section rather than just linking to guides, allowing AI to extract direct answers.
- Add a specific 'FAQ' schema section addressing common beginner questions to capture 'People Also Ask' features more effectively.
